**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Please allow alternative ISPs to thrive by not allowing backbone infrastructure providers to make these services 2nd class. I'm all for infra providers collecting fees for the services they offer, but given the limited ability for anyone else to build competitive backbone and Long haul infra there needs to be solid regulation to allow competitors and better customer service. Personally for over 5 years I had to choose between only 2 expensive copper options in our metro area. Both options from Comcast and AT&T were high cost and known bad customer service. Sonic allowed us to afford quality internet and delivers customer service no major provider can match. Major players should be asked to focus on the customers. Regulate quality, truthfulness, fairness, business practices etc. while keeping the internet open to access.
